Professional Experience

Auriga IT — Software Development Engineer II (SDE 2) [July 2023 – Present]

- **Performance:** Revitalized monolithic **Django** architecture, achieving a **90% reduction in PDF generation time (Apache FOP)** and **over 40% reduction in DB load** via meticulous query and transaction optimization.
- **APIs & Integrations:** Designed and built **REST APIs (Django)** for critical third-party service integration, including **Shopify, WhatsApp API**, and various **ERPs**.
- **Scalability & Quality:** Implemented **Celery/Redis** for asynchronous task queuing and **Established TDD framework** using Pytest, significantly improving code quality and maintainability. Incremental backup strategies for robust growth.
- **Leadership:** Drove internal Learning & Development (L&D) initiatives, including launching a bounty program and leading advanced Python knowledge-sharing sessions.

PartyPal — Backend Engineer [April 2023 – July 2023]

- Developed a scalable backend (147+ endpoints, 61 schemas) for a social media/booking platform, supporting **1000+ users**.
- Implemented **Multi-factor authentication (Firebase)**, push notifications, **Spotify/Instagram** integrations, payment processing, **RBAC**, and a personalized user recommendation system.

Scrol.ai — Front-End Engineer [Sept. 2022 – Jan 2023]

- Developed a **React PWA** for AI-driven document chat (knowledge base creation).
- Implemented **Server-Sent Events (SSE)** for handling generative data and added Bulk File Uploads.

Projects

AI-Driven Programmatic SEO Platform - Django

- **AI & Programmatic SEO:** Developed and integrated an **AI-powered programmatic content generation pipeline** to scale content production, driving consistent organic traffic growth and achieving **100+ daily active users**.
- **Performance & Architecture:** Engineered a high-speed, SEO-optimized platform using **Next.js (SSR)** and **Django**, optimizing page load times and implementing structured data for superior search engine visibility.
- **Global Accessibility:** Built a robust **multilingual translation system** to support an international audience, significantly expanding platform reach and accessibility.

Financial Policy Manager - Django

- Digital Fund Management tool for Bank Policy Managers to manage Recurring & Fixed Deposits, Health, Motor & Oriental Insurances. Build with Django Admin Customization. Generates and Send Analytics using **Message queue**.
- Automated Payment Reminders and revenue calculations.

Skills

Backend: Python (Django, Django Rest Framework (DRF), Flask, FastAPI), **Java**, Node.js, **PostgreSQL**, MariaDB, MongoDB, Sequelize ORM

Frontend: React (Next.js, SSR/SSG), JavaScript/TypeScript, HTML/CSS

Cloud & DevOps: AWS (S3), **Docker**, **Kubernetes (K8s)**, **Firebase**, **Terraform**, CI/CD, GitOps

Messaging & Caching: **Redis**, **Celery**, **Kafka****Testing & Tools**Pytest (TDD), Django Debug Toolbar, **Apache FOP**, **Git** (GitHub/GitLab)

Architectural & API: **REST APIs**, **Server Sent Events (SSE)**, Webhooks, OAuth, Role-Based Access Control (RBAC), Payment Integration

Education

B.Tech, Computer Science Engineering (2023)

Swami Keshvanand Institute of Technology, Jaipur

9.2 CGPA

Leadership & Community

- Hosted Webinars on **Web Development, IOT & Django Admin Customization**
- Participated as a core member in **DesignKul (UI/UX Community)** to enhance knowledge on **Development with User Experience**
- Grew a Student Community from 50 to **400+** through strategic outreach and engagement initiatives.
